

## 2027학년도 수능 대비 모의평가

### 1. 다음 글의 목적으로 가장 적절한 것은?

Dear Ms. Green, My name is Donna Williams, a science teacher at Rogan High School. I am planning a special workshop for our science teachers. We are interested in learning how to teach online science classes. I have been impressed with your ideas about using internet platforms for science classes. Since you are an expert in online education, I would like to ask you to deliver a special lecture at the workshop scheduled for next month. I am sure the lecture will help our teachers manage successful online science classes, and I hope we can learn from your insights. I am looking forward to hearing from you. Sincerely, Donna Williams

- ① 과학 교육 정책 협의회 참여를 독려하려고
- ② 과학 교사 워크숍의 특강을 부탁하려고
- ③ 과학 교사 채용 계획을 공지하려고
- ④ 과학 교육 프로그램 개발을 요청하려고
- ⑤ 과학 교육 워크숍 일정의 변경을 안내하려고

### 2. 다음 글의 주제로 가장 적절한 것은? (3점)

Emphasizing speed over frequency can make sense in contexts where everyone is expected to plan around the timetable, including peak-only commute services and very long trips with low demand. In all other contexts, though, it seems to be a common motorist's error. Roads are there all the time, so their speed is the most important fact that distinguishes them. But transit is only there if it's coming soon. If you have a car, you can use a road whenever you want and experience its speed. But transit has to exist when you need it (span), and it needs to be coming soon (frequency). Otherwise, waiting time will wipe out any time savings from a faster service. Unless you're comfortable planning your life around a particular scheduled trip, speed is worthless without frequency, so a transit map that screams about speed and whispers about frequency may simply be planting confusion.

- ① consequences of adjusting frequency of transit
- ② significance of designing an accurate transit map
- ③ importance of valuing frequency in public transportation
- ④ impact of creating high-speed public transportation systems
- ⑤ methods to improve speed and frequency of commute services

### 3. 다음 글의 제목으로 가장 적절한 것은? (3점)

The selfie resonates not because it is new, but because it expresses, develops, expands, and intensifies the long history of the self-portrait. The self-portrait showed to others the status of the person depicted. In this sense, what we have come to call our own "image" — the interface of the way we think we look and the way others see us — is the first and fundamental object of global visual culture. The selfie depicts the drama of our own daily performance of ourselves in tension with our inner emotions that may or may not be expressed as we wish. At each stage of the self-portrait's expansion, more and more people have been able to depict themselves. Today's young, urban, networked majority has reworked the history of the self-portrait to make the selfie into the first visual signature of the new era.

- ① Are Selfies Just a Temporary Trend in Art History?
- ② Fantasy or Reality: Your Selfie Is Not the Real You
- ③ The Selfie: A Symbol of Self-oriented Global Culture
- ④ The End of Self-portraits: How Selfies Are Taking Over
- ⑤ Selfies, the Latest Innovation in Representing Ourselves

4. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은? (3점)

Like whole individuals, cells have a life span. During their life cycle (cell cycle), cell size, shape, and metabolic activities can change dramatically. A cell is "born" as a twin when its mother cell divides, ①producing two daughter cells. Each daughter cell is smaller than the mother cell, and except for unusual cases, each grows until it becomes as large as the mother cell ②was. During this time, the cell absorbs water, sugars, amino acids, and other nutrients and assembles them into new, living protoplasm. After the cell has grown to the proper size, its metabolism shifts as it either prepares to divide or matures and ③differentiates into a specialized cell. Both growth and development require a complex and dynamic set of interactions involving all cell parts. ④What cell metabolism and structure should be complex would not be surprising, but actually, they are rather simple and logical. Even the most complex cell has only a small number of parts, each ⑤responsible for a distinct, well-defined aspect of cell life.

5. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

The computer has, to a considerable extent, solved the problem of acquiring, preserving, and retrieving information. Data can be stored in effectively unlimited quantities and in manageable form. The computer makes available a range of data unattainable in the age of books. It packages it effectively; style is no longer needed to make it accessible, nor is memorization. In dealing with a single decision separated from its context, the computer supplies tools unimaginable even a decade ago. But it also diminishes perspective. Because information is so accessible and communication instantaneous, there is a diminution of focus on its significance, or even on the definition of what is significant. This dynamic may encourage policymakers to wait for an issue to arise rather than anticipate it, and to regard moments of decision as a series of isolated events rather than part of a historical continuum. When this happens, manipulation of information replaces reflection as the principal policy tool.

\*retrieve: (정보를) 추출하다 \*\*diminution: 감소

Although the computer is clearly (A) at handling information in a decontextualized way, it interferes with our making (B) judgments related to the broader context, as can be seen in policymaking processes.

- | (A)           | (B)                 | (A)          | (B)          |
|---------------|---------------------|--------------|--------------|
| ① competent   | ..... comprehensive | ② dominant   | ..... biased |
| ③ imperfect   | ..... informed      | ④ impressive | ..... legal  |
| ⑤ inefficient | ..... timely        |              |              |

## 정답 및 해설

### 1. [정답] ②

#### [해설]

글의 중반부 'I would like to ask you to deliver a special lecture at the workshop scheduled for next month.'라는 문장에서 필자가 워크숍의 특별 강연을 요청하고 있음이 명확하게 드러난다. 따라서 글의 목적은 '과학 교사 워크숍의 특강을 부탁하려고'이다.

---

### 2. [정답] ③

#### [해설]

필자는 대중교통에서 속도보다 운행 빈도(frequency)가 더 중요하다고 주장한다. 'speed is worthless without frequency(빈도 없이는 속도는 가치가 없다)'라는 문장에서 핵심 주장이 드러난다. 대중교통은 필요할 때 바로 이용할 수 있어야 하며, 아무리 빨라도 오래 기다려야 한다면 의미가 없다는 것이다. 따라서 글의 주제는 '대중교통에서 운행 빈도를 중시하는 것의 중요성'이다.

---

### 3. [정답] ⑤

#### [해설]

지문은 셀피가 완전히 새로운 것이 아니라 자화상(self-portrait)의 오랜 역사를 계승하고 확장한 것이라고 주장한다. 셀피가 오늘날의 젊은 세대에게 '새로운 시대의 첫 번째 시각적 서명(the first visual signature of the new era)'이 되었다고 설명하며, 자신을 표현하는 최신 방식으로 셀피를 조명하고 있다. 따라서 '셀피, 우리 자신을 표현하는 가장 최신의 혁신'이 제목으로 적절하다.

---

### 4. [정답] ④

#### [해설]

④번의 'What'은 선행사를 포함하는 관계대명사로, 뒤에 주어나 목적어가 없는 불완전한 절이 와야 한다. 하지만 'cell metabolism and structure should be complex'는 주어(cell metabolism and structure), 조동사+동사(should be), 보어(complex)를 모두 갖춘 완전한 문장이다. 따라서 'What'을 쓸 수 없다. 문맥상 '세포의 신진대사와 구조가 복잡해야 한다는 것은'이라는 의미의 명사절이 주어로 와야 하므로, 명사절 접속사 'That'으로 고쳐야 한다.

---

### 5. [정답] ①

#### [해설]

지문은 컴퓨터가 정보를 획득, 보존, 추출하는 문제를 해결했으며, 맥락에서 분리된 단일 결정을 다루는 데 상상할 수 없는 도구를 제공한다고 칭찬한다. 이는 컴퓨터가 정보를 다루는 데 (A) 유능하다(competent)는 것을 의미한다. 하지만 동시에 컴퓨터는 '관점(perspective)'을 감소시키고, 정책 결정자들이 사건을 '역사적 연속체의 일부'로 보지 못하게 한다고 비판한다. 이는 컴퓨터가 더 넓은 맥락과 관련된 (B) 종합적인(comprehensive) 판단을 내리는 것을 방해한다는 것을 의미한다.

---
