1. 다음 글의 목적으로 가장 적절한 것은?

Dear Mr. Anderson: My name is Sophia Willis, Events Manager of the 2020 Caroline County Art Contest. I am currently looking for a place for this year's contest exhibition. The Caroline County Art Contest has had over one hundred artworks submitted to us by local artists. For the theme, we wanted artists to explore the natural world of Caroline County. I believe the Garden Caf Gallery would be a perfect place to host the event, as your gallery is well-known for its beautiful garden. The exhibition is usually held throughout October, and we very much hope that we can rent a space for the exhibition at the Garden Caf Gallery during this time. I look forward to your response. Yours sincerely, Sophia Willis

- ① 출품 작품 전시회에 초대하려고
- ② 작품 제출 방법의 변경을 안내하려고
- ③ 출품 작품 전시 장소 대여를 문의하려고
- ④ 정원 박람회의 변경된 일정을 공지하려고
- ⑤ 지역 예술가들에게 작품 제출을 독려하려고

2. 다음 글의 주제로 가장 적절한 것은?

It is much more natural to be surprised by unusual phenomena like eclipses than ordinary phenomena like falling bodies or the succession of night into day and day into night. Many cultures invented gods to explain these eclipses that shocked, frightened, or surprised them; but very few imagined a god of falling bodies to which they were so accustomed that they did not even notice them. But the reason for eclipses is ultimately the same as that of the succession of night and day: the movement of celestial bodies, which itself is based on the Newtonian law of attraction and how it explains why things fall when we let them go. For the physicist, understanding the ordinary, the habitual, and the frequent thus allows us to account for the frightening and the singular. As such, it was thus necessary to ask "Why do things fall?" and to have Newton's response to understand a broad range of much more bizarre phenomena occurring at every level of the universe.

- ① widespread preference for mythical explanations over scientific ones
- ② limitations of Newtonian law in explaining eclipse phenomena
- ③ influence of scientific interpretations on perceptions of reality
- ④ need to pose questions about the usual to understand the unusual
- ⑤ difficulty of drawing general conclusions from unusual phenomena

Racial and ethnic relations in the United States are better today than in the past, but many changes are needed before sports are a model of inclusion and fairness. The challenges today are different from the ones faced twenty years ago, and experience shows that when current challenges are met, a new social situation is created in which new challenges emerge. For example, once racial and ethnic segregation is eliminated and people come together, they must learn to live, work, and play with each other despite diverse experiences and cultural perspectives. Meeting this challenge requires a commitment to equal treatment, plus learning about the perspectives of others, understanding how they define and give meaning to the world, and then determining how to form and maintain relationships while respecting differences, making compromises, and supporting one another in the pursuit of goals that may not always be shared. None of this is easy, and challenges are never met once and for all time.

An interesting aspect of human psychology is that we tend to like things more and find them more ①appealing if everything about those things is not obvious the first time we experience them. This is certainly true in music. For example, we might hear a song on the radio for the first time that catches our interest and ②decide we like it. Then the next time we hear it, we hear a lyric we didn't catch the first time, or we might notice ③what the piano or drums are doing in the background. A special harmony ④emerges that we missed before. We hear more and more and understand more and more with each listening. Sometimes, the longer ⑤that takes for a work of art to reveal all of its subtleties to us, the more fond of that thing — whether it's music, art, dance, or architecture — we become.

5. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

Time spent on on-line interaction with members of one's own, preselected community leaves less time available for actual encounters with a wide variety of people. If physicists, for example, were to concentrate on exchanging email and electronic preprints with other physicists around the world working in the same specialized subject area, they would likely devote less time, and be less receptive to new ways of looking at the world. Facilitating the voluntary construction of highly homogeneous social networks of scientific communication therefore allows individuals to filter the potentially overwhelming flow of information. But the result may be the tendency to overfilter it, thus eliminating the diversity of the knowledge circulating and diminishing the frequency of radically new ideas. In this regard, even a journey through the stacks of a real library can be more fruitful than a trip through today's distributed virtual archives, because it seems difficult to use the available "search engines" to emulate efficiently the mixture of predictable and surprising discoveries that typically result from a physical shelf-search of an extensive library collection.

Focusing on on-line interaction with people who are engaged in the same specialized area can ____ (A) ____ potential sources of information and thus make it less probable for ____ (B) ____ findings to happen.

- | (A) | (B) | (A) | (B) |
|-------------|------------------|-------------|------------------|
| ① limit | unexpected | ② limit | distorted |
| ③ diversify | misleading | ④ diversify | accidental |
| ⑤ provide | novel | | |
