

2027학년도 수능 대비 모의평가

1. 다음 글의 목적으로 가장 적절한 것은?

Dear New Members, Welcome to Rock Climbing Club and hope you will get the most out of this rewarding sport. As beginners, you may be nervous in anticipation of your first climb. Many of you have asked about what climbing equipment to buy, such as boots, ropes, helmets, and gloves. You don't have to bother yourself with these concerns. We offer a special service that will rent you all the equipment you will ever need for climbing. The rental service is always available for our members. Just come on Saturday, ask for the rental service, and be ready to have a fun climb. I look forward to seeing you all this Saturday at 9 a.m. Sincerely, John B. Snyder

In writing a life, the life narrator and the biographer engage different kinds of evidence. Most biographers incorporate multiple forms of evidence, including historical documents, interviews, and family archives, which they evaluate for validity. Relatively few biographers use their personal memories of their subject as reliable evidence, unless they had a personal relationship to the subject of the biography (as a relative, child, friend, or colleague). For life narrators, by contrast, personal memories are the primary archival source. They may have recourse to other kinds of sources letters, journals, photographs, conversations and to their knowledge of a historical moment. But the usefulness of such evidence for their stories lies in the ways in which they employ that evidence to support, supplement, or offer commentary on their personalized acts of remembering. In autobiographical narratives, imaginative acts of remembering always overlap with such rhetorical acts as assertion, justification, judgment, conviction, and questioning.

- ① role of personal memories in different types of life storytelling
- ② advantages of documenting evidence-based family histories
- ③ influence of the source types on the quality of life narratives
- ④ similarity of data sources in describing a person's life
- ⑤ crucial conditions for the success of life narrators

Not only musicians and psychologists, but also committed music enthusiasts and experts often voice the opinion that the beauty of music lies in an expressive deviation from the exactly defined score. Concert performances become interesting and gain in attraction from the fact that they go far beyond the information printed in the score. In his early studies on musical performance, Carl Seashore discovered that musicians only rarely play two equal notes in exactly the same way. Within the same metric structure, there is a wide potential of variations in tempo, volume, tonal quality and intonation. Such variation is based on the composition but diverges from it individually. We generally call this 'expressivity'. This explains why we do not lose interest when we hear different artists perform the same piece of music. It also explains why it is worthwhile for following generations to repeat the same repertoire. New, inspiring interpretations help us to expand our understanding, which serves to enrich and animate the music scene.

"Monumental" is a word that comes very close to ①expressing the basic characteristic of Egyptian art. Never before and never since has the quality of monumentality been achieved as fully as it ②did in Egypt. The reason for this is not the external size and massiveness of their works, although the Egyptians admittedly achieved some amazing things in this respect. Many modern structures exceed ③those of Egypt in terms of purely physical size. But massiveness has nothing to do with monumentality. An Egyptian sculpture no bigger than a person's hand is more monumental than that gigantic pile of stones ④that constitutes the war memorial in Leipzig, for instance. Monumentality is not a matter of external weight, but of "inner weight." This inner weight is the quality which Egyptian art possesses to such a degree that everything in it seems to be made of primeval stone, like a mountain range, even if it is only a few inches across or ⑤carved in wood.

Research for historical fiction may focus on under-documented ordinary people, events, or sites. Fiction helps portray everyday situations, feelings, and atmosphere that recreate the historical context. Historical fiction adds "flesh to the bare bones that historians are able to uncover and by doing so provides an account that while not necessarily true provides a clearer indication of past events, circumstances and cultures." Fiction adds color, sound, drama to the past, as much as it invents parts of the past. And Robert Rosenstone argues that invention is not the weakness of films, it is their strength. Fiction can allow users to see parts of the past that have never for lack of archives been represented. In fact, Gilden Seavey explains that if producers of historical fiction had strongly held the strict academic standards, many historical subjects would remain unexplored for lack of appropriate evidence. Historical fiction should, therefore, not be seen as the opposite of professional history, but rather as a challenging representation of the past from which both public historians and popular audiences may learn.

While historical fiction reconstructs the past using ____ (A) ____ evidence, it provides an inviting description, which may ____ (B) ____ people's understanding of historical events.
