Dear Future Pilots, We are very excited to announce that we will offer the Summer Aviation Flight Camp for student pilot certificates. It will be held from July 20 to August 3, 2019 at O'Ryan Flight School. The summer camp will include programs in which participants can receive flight instruction from professional pilots, go on field trips, try flight simulators, and do a lot more. Because of the aviation regulation for student pilots, the camp is limited to participants over 16 years old. Please see the attached document for registration and tuition information. If you have further questions about the camp, please contact the coordinator at 714-3127-1004. Sincerely, Todd O'Ryan Director

1950s critics separated themselves from the masses by rejecting the 'natural' enjoyment afforded by products of mass culture through judgments based on a refined sense of realism. For example, in most critics championing Douglas Sirk's films' social critique, self-reflexivity, and, in particular, distancing effects, there is still a refusal of the 'vulgar' enjoyments suspected of soap operas. This refusal again functions to divorce the critic from an image of a mindless, pleasure-seeking crowd he or she has actually manufactured in order to definitively secure the righteous logic of 'good' taste. It also pushes negative notions of female taste and subjectivity. Critiques of mass culture seem always to bring to mind a disrespectful image of the feminine to represent the depths of the corruption of the people. The process of taste-making operated, then, to create hierarchical differences between the aesthete and the masses through the construction of aesthetic positions contrary to the perceived tasteless pleasures of the crowd.

- ① critics' negative view on popular tastes and its effects
- ② criticism of cultural hierarchy in soap operas and films
- ③ side effects of popularized cultural products on crowds
- ④ resistance of the masses to cultural separations and its origins
- ⑤ critics' tendency to identify the refined tastes of the masses

Individual authors and photographers have rights to their intellectual property during their lifetimes, and their heirs have rights for 70 years after the creator's death, so any publication less than 125 years old has to be checked for its copyright status. The duration of copyright protection has increased steadily over the years; the life-plus-70-years standard was set by the Copyright Term Extension Act of 1998, which increased the 50-year limit established by the 1976 Copyright Act. Supporters of such legislation like to defend these increases with tales of starving writers and their impoverished descendants, but in reality the beneficiaries are more likely to be transnational publishing companies. And note that copyright laws serve a dual purpose. In addition to protecting the rights of authors so as to encourage the publication of new creative works, copyright is also supposed to place reasonable time limits on those rights so that outdated works may be incorporated into new creative efforts. Therefore, the extended copyright protection frustrates new creative endeavors such as including poetry and song lyrics on Internet sites.

Changes in the degree of closeness ①are quite important in managing emotional intensity. Take, for example, emotions induced by television. Closeness and familiarity are important in making the fictional environment more ②real. Accordingly, most TV shows are set in the present or in a time within the memory of the viewers. Most characters are supposed to be types with whom we are familiar. Such closeness and familiarity make it easier for us ③perceive the imaginary story to be a real one. In other circumstances, such as when violence is shown on TV, the closeness variable is used to reduce emotional intensity. Television entertainment tends to place social problems involving violence in another time and place, letting us watch those fictionalized characters search for solutions to our problems in settings ④safely distanced from our own. When violence occurs in a contemporary setting, it is generally the product of the interaction of police and criminals again, it is ⑤removed from the lives of good citizenry.

Even those with average talent can produce notable work in the various sciences, so long as they do not try to embrace all of them at once. Instead, they should concentrate attention on one subject after another (that is, in different periods of time), although later work will weaken earlier attainments in the other spheres. This amounts to saying that the brain adapts to universal science in time but not in space. In fact, even those with great abilities proceed in this way. Thus, when we are astonished by someone with publications in different scientific fields, realize that each topic was explored during a specific period of time. Knowledge gained earlier certainly will not have disappeared from the mind of the author, but it will have become simplified by condensing into formulas or greatly abbreviated symbols. Thus, sufficient space remains for the perception and learning of new images on the cerebral blackboard.

Exploring one scientific subject after another __ (A) __ remarkable work across the sciences, as the previously gained knowledge is retained in simplified forms within the brain, which __ (B) __ room for new learning.
