

2027학년도 수능 대비 모의평가

1. 다음 글의 목적으로 가장 적절한 것은?

Dear Ms. Diane Edwards, I am a teacher working at East End High School. I have read from your notice that the East End Seaport Museum is now offering a special program, the 2017 Bug Lighthouse Experience. The program would be a great opportunity for our students to have fun and experience something new. I estimate that 50 students and teachers from our school would like to participate in it. Would you please let me know if it is possible to make a group reservation for the program for Saturday, November 18? We don't want to miss this great opportunity. I look forward to hearing from you soon. Best regards, Joseph Loach

- ① 프로그램 단체 예약이 가능한지를 문의하려고
- ② 특별 프로그램 개설에 대해 감사하려고
- ③ 학교 행사 일정의 변경을 공지하려고
- ④ 프로그램 내용에 대한 설명을 요구하려고
- ⑤ 박물관 관람 시 유의 사항을 확인하려고

2. 다음 글의 주제로 가장 적절한 것은?

While many city shoppers were clearly drawn to the notion of buying and eating foods associated with nature, the nature claimed by the ads was no longer the nature that created the foods. Indeed, the nature claimed by many ads was associated with food products only by the ads' attachment. This is clearly a case of what French sociologist Henri Lefebvre has called "the decline of the referentials," or the tendency of words under the influence of capitalism to become separated from meaningful associations. Increasingly, food ads helped shoppers become accustomed to new definitions of words such as "fresh" and "natural," definitions that could well be considered opposite of their traditional meanings. The new definitions better served the needs of the emerging industrial food system, which could not supply foods that matched customary meanings and expectations. And they better met shoppers' desires, although with pretense.

- ① decline of reliability in the ads of natural foods
- ② changes in the senses of words linked to food ads
- ③ influence of capitalism on the industrial food system
- ④ various ways to attract customers in the food industry
- ⑤ necessity of meaningful word associations in commercials

3. 다음 글의 제목으로 가장 적절한 것은? (3점)

If you've ever seen the bank of flashing screens at a broker's desk, you have a sense of the information overload they are up against. When deciding whether to invest in a company, for example, they may take into account the people at the helm; the current and potential size of its market; net profits; and its past, present, and future stock value, among other pieces of information. Weighing all of these factors can take up so much of your working memory that it becomes overwhelmed. Think of having piles and piles of papers, sticky notes, and spreadsheets strewn about your desk, and you get a picture of what's going on inside the brain. When information overloads working memory this way, it can make brokers — and the rest of us — scrap all the strategizing and analyses and go for emotional, or gut, decisions.

*at the helm: 책임을 맡고 있는 **strewn: 흩뿌려진

Most historians of science point to the need for a reliable calendar to regulate agricultural activity as the motivation for learning about what we now call astronomy, the study of stars and planets. Early astronomy provided information about when to plant crops and gave humans ①their first formal method of recording the passage of time. Stonehenge, the 4,000-year-old ring of stones in southern Britain, ②is perhaps the best-known monument to the discovery of regularity and predictability in the world we inhabit. The great markers of Stonehenge point to the spots on the horizon ③where the sun rises at the solstices and equinoxes the dates we still use to mark the beginnings of the seasons. The stones may even have ④been used to predict eclipses. The existence of Stonehenge, built by people without writing, bears silent testimony both to the regularity of nature and to the ability of the human mind to see behind immediate appearances and ⑤discovers deeper meanings in events.

5. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

In some subject areas, topics build on one another in a hierarchical fashion, so that a learner must almost certainly master one topic before moving to the next. For example, an elementary school student should probably master principles of addition before moving to multiplication, because multiplication is an extension of addition. Similarly, a medical student must have expertise in human anatomy before studying surgical techniques: It's difficult to perform an appendectomy if you can't find the appendix. Vertical transfer refers to such situations: A learner acquires new knowledge or skills by building on more basic information and procedures. In other cases, knowledge of one topic may affect learning a second topic even though the first isn't a necessary condition for the second. Knowledge of French isn't essential for learning Spanish, yet knowing French can help with Spanish because many words are similar in the two languages. When knowledge of the first topic is helpful but not essential to learning the second one, lateral transfer is occurring.

In vertical transfer, lower level knowledge is (A) before one proceeds to a higher level; however, in the case of lateral transfer, (B) knowledge can be helpful, but it is not required.

- | (A) | (B) | (A) | (B) |
|-------------|----------------|-------------|-------------------|
| ① essential | prior | ② practical | detailed |
| ③ useless | relevant | ④ practical | independent |
| ⑤ essential | unbiased | | |
