

2027학년도 수능 대비 모의평가

1. 다음 글의 목적으로 가장 적절한 것은?

Dear Natalie Talley, My name is Olivia Spikes, the mayor of Millstown. Before you attend the world championships next month, on behalf of everyone in Millstown, I wish to let you know that we are supporting you all the way. As you are the first famous figure skater from Millstown, we are all big fans of yours. Our community was so proud of you for winning the national championships last year. Your amazing performance really moved us all. We all believe that you are going to impress the entire nation again. Your hometown supporters will cheer for you whenever you perform on the ice. Good luck! Best wishes, Olivia Spikes

- ① 지역 사회 홍보 대사로 활동해 줄 것을 제안하려고
- ② 이웃 도시와 예정된 친선 경기 취소를 통보하려고
- ③ 지역 사회 출신 피겨 스케이팅 선수를 응원하려고
- ④ 시청에서 주관하는 연례 자선 행사를 홍보하려고
- ⑤ 피겨 스케이팅 경기장 건립을 위한 기부를 요청하려고

2. 다음 글의 주제로 가장 적절한 것은?

Conventional wisdom in the West, influenced by philosophers from Plato to Descartes, credits individuals and especially geniuses with creativity and originality. Social and cultural influences and causes are minimized, ignored, or eliminated from consideration at all. Thoughts, original and conventional, are identified with individuals, and the special things that individuals are and do are traced to their genes and their brains. The "trick" here is to recognize that individual humans are social constructions themselves, embodying and reflecting the variety of social and cultural influences they have been exposed to during their lives. Our individuality is not denied, but it is viewed as a product of specific social and cultural experiences. The brain itself is a social thing, influenced structurally and at the level of its connectivities by social environments. The "individual" is a legal, religious, and political fiction just as the "I" is a grammatical illusion.

- ① recognition of the social nature inherent in individuality
- ② ways of filling the gap between individuality and collectivity
- ③ issues with separating original thoughts from conventional ones
- ④ acknowledgment of the true individuality embodied in human genes
- ⑤ necessity of shifting from individualism to interdependence

3. 다음 글의 제목으로 가장 적절한 것은?

From the late nineteenth century on, the dullness found in the senile, their isolation and withdrawal, their clinging to the past and lack of interest in worldly affairs were characteristically represented as the symptoms of senility — the social shame of the inevitable deterioration of the brain. Following World War II, academic discourse on aging typically represented these as the causes of senility. The location of senile mental deterioration was no longer the aging brain but a society that, through involuntary retirement, social isolation, and the loosening of traditional family ties, stripped the elderly of the roles that had sustained meaning in their lives. When elderly people were deprived of these meaningful social roles, when they became increasingly isolated and were cut off from the interests and activities that had earlier occupied them, not surprisingly their mental functioning deteriorated. The elderly did not so much lose their minds as lose their place.

*senile: 노쇠한 **deterioration: 악화

4. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은? (3점)

Consider The Wizard of Oz as a psychological study of motivation. Dorothy and her three friends work hard to get to the Emerald City, overcoming barriers, persisting against all adversaries. They do so because they expect the Wizard to give ①them what they are missing. Instead, the wonderful (and wise) Wizard makes them aware that they, not he, always had the power ②to fulfill their wishes. For Dorothy, home is not a place but a feeling of security, of comfort with people she loves; it is wherever her heart is. The courage the Lion wants, the intelligence the Scarecrow longs for, and the emotions the Tin Man dreams of ③being attributes they already possess. They need to think about these attributes not as internal conditions but as positive ways ④in which they are already relating to others. After all, didn't they demonstrate those qualities on the journey to Oz, a journey ⑤motivated by little more than an expectation, an idea about the future likelihood of getting something they wanted?

5. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

The evolutionary process works on the genetic variation that is available. It follows that natural selection is unlikely to lead to the evolution of perfect, 'maximally fit' individuals. Rather, organisms come to match their environments by being 'the fittest available' or 'the fittest yet': they are not 'the best imaginable'. Part of the lack of fit arises because the present properties of an organism have not all originated in an environment similar in every respect to the one in which it now lives. Over the course of its evolutionary history, an organism's remote ancestors may have evolved a set of characteristics evolutionary 'baggage' that subsequently constrain future evolution. For many millions of years, the evolution of vertebrates has been limited to what can be achieved by organisms with a vertebral column. Moreover, much of what we now see as precise matches between an organism and its environment may equally be seen as constraints: koala bears live successfully on Eucalyptus foliage, but, from another perspective, koala bears cannot live without Eucalyptus foliage.

The survival characteristics that an organism currently carries may act as a(n) (A) to its adaptability when the organism finds itself coping with changes that arise in its (B) .

- | (A) | (B) | (A) | (B) |
|---------------|--------------|-------------|--------------------|
| ① improvement | diet | ② obstacle | surroundings |
| ③ advantage | genes | ④ regulator | mechanisms |
| ⑤ guide | traits | | |
