

2027학년도 수능 대비 모의평가

1. 다음 글의 목적으로 가장 적절한 것은?

Hello, everyone! Welcome back to your favorite online channel, With Ethan. As always, I'm trying to make this channel a place that my followers of all ages can enjoy. Recently, in the comments section, there have been some examples of language that is inappropriate for younger viewers. Also, there have been some comments that are not relevant to this channel. These kinds of comments are unacceptable for a channel like this. I would really like to ask that all of my followers keep these things in mind so that we can all enjoy this channel. I always appreciate your time and support. Please keep watching.

Some psychologists believe that insight is the result of a restructuring of a problem after a period of non-progress where the person is believed to be too focused on past experience and get stuck. A new manner to represent the problem is suddenly discovered, leading to a different path to a solution heretofore unpredicted. It has been claimed that no specific knowledge, or experience is required to attain insight in the problem situation. As a matter of fact, one should break away from experience and let the mind wander freely. Nevertheless, experimental studies have shown that insight is actually the result of ordinary analytical thinking. The restructuring of a problem can be caused by unsuccessful attempts in solving the problem, leading to new information being brought in while the person is thinking. The new information can contribute to a completely different perspective in finding a solution, thus producing the Aha! Experience.

*heretofore: 지금까지

- ① disadvantages of experience in creative thinking
- ② significance of analytical thinking in gaining insight
- ③ contribution of insight in forming a new perspective
- ④ necessity of separating insight from analytical thinking
- ⑤ difficulty of acquiring in-depth knowledge from experience

Invasions of natural communities by non-indigenous species are currently rated as one of the most important global-scale environmental problems. The loss of biodiversity has generated concern over the consequences for ecosystem functioning and thus understanding the relationship between both has become a major focus in ecological research during the last two decades. The "biodiversity-invasibility hypothesis" by Elton suggests that high diversity increases the competitive environment of communities and makes them more difficult to invade. Numerous biodiversity experiments have been conducted since Elton's time and several mechanisms have been proposed to explain the often observed negative relationship between diversity and invasibility. Beside the decreased chance of empty ecological niches but the increased probability of competitors that prevent invasion success, diverse communities are assumed to use resources more completely and, therefore, limit the ability of invaders to establish. Further, more diverse communities are believed to be more stable because they use a broader range of niches than species-poor communities.

Accepting whatever others are communicating only pays off if their interests correspond to ours think cells in a body, bees in a beehive. As far as communication between humans is concerned, such commonality of interests ①is rarely achieved; even a pregnant mother has reasons to mistrust the chemical signals sent by her fetus. Fortunately, there are ways of making communication work even in the most adversarial of relationships. A prey can convince a predator not to chase ②it. But for such communication to occur, there must be strong guarantees ③which those who receive the signal will be better off believing it. The messages have to be kept, on the whole, ④honest. In the case of humans, honesty is maintained by a set of cognitive mechanisms that evaluate ⑤communicated information. These mechanisms allow us to accept most beneficial messages to be open while rejecting most harmful messages to be vigilant.

*fetus: 태아 **adversarial: 반대자의 ***vigilant: 경계하는

5. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

Research from the Harwood Institute for Public Innovation in the USA shows that people feel that 'materialism' somehow comes between them and the satisfaction of their social needs. A report entitled Yearning for Balance, based on a nationwide survey of Americans, concluded that they were 'deeply ambivalent about wealth and material gain'. A large majority of people wanted society to 'move away from greed and excess toward a way of life more centred on values, community, and family'. But they also felt that these priorities were not shared by most of their fellow Americans, who, they believed, had become 'increasingly atomized, selfish, and irresponsible'. As a result they often felt isolated. However, the report says, that when brought together in focus groups to discuss these issues, people were 'surprised and excited to find that others shared their views'. Rather than uniting us with others in a common cause, the unease we feel about the loss of social values and the way we are drawn into the pursuit of material gain is often experienced as if it were a purely private ambivalence which cuts us off from others.

*ambivalent: 양면 가치의

Many Americans, believing that materialism keeps them from ____ (A) ____ social values, feel detached from most others, but this is actually a fairly ____ (B) ____ concern.

- | (A) | (B) | (A) | (B) |
|------------|-------------------|------------|---------------|
| ① pursuing | unnecessary | ② pursuing | common |
| ③ holding | personal | ④ denying | ethical |
| ⑤ denying | primary | | |
